

Particularly important:

- The best preparation for the School is a regular visit to the day care center (Kita)
- Take therapy recommendations very seriously at all times.
- Support your children but never practice with a target in mind and do not put pressure on them.
- Physically passive activities need to be balanced with movement.
- Children need enough sleep, healthy food and lots of outdoors action.
- Sometimes children get too much excitement that they often cannot even process.
- A moderate and critical use of computers, cellphones and alike is very important.
- Children need again and again moments in which they can relax and come to rest.

Useful Information for Parents

Pre-School Fostering Learning Possibilities

Play with me! Fostering means: „to do something together“

- Playful fostering of different competencies
- “I am packing my suitcase” („Ich packe meinen Koffer“)
(memory ability/vocabulary)
- View picture books, tell stories and read aloud
(general education/vocabulary)
- „Memory“
(visual perception/memory ability)
- “I can see something, that you cannot see” („Ich sehe was, was du nicht siehst“)
(visual perception/vocabulary)
- “All birds fly high” („Alle Vögel fliegen hoch“)
(auditory perception/general education)
- Play board games
- Be creative together
- Early musical education:
positive feedback for the learning development

- Many primary experiences:
tree climbing, play with sand and water
- Help to become independent:
dress alone, tie a bow etc.
- Practice behavior in traffic:
point out dangers
- Experience everyday life consciously:
cook, do groceries,
make phone calls together etc.
- Promote good social behavior:
Respect for other people and the environment,
getting, accepting and giving help,
showing and recognizing feelings,
being able to listen and wait and
develop friendships

**And much more...
Stay in contact
with your child.**
