

WHAT IS THE EDUCATION AND PARTICIPATION PACKAGE?

With the benefits for education and participation, children, adolescents and young adults have better opportunities to develop themselves and to take part in social life. The various services for education and participation support children, adolescents and young adults from families who need financial support. With these services, your child can take advantage of offers from day-care, school and leisure when you could not afford the costs otherwise.

Participation means that everyone can be part of everything and take part in social life. This means, for example, that children and young people visit a sports club and play soccer together. Or learn how to play an instrument in a music school.
